

Featuring FF450<sup>plus</sup>

## Content Imaging

Carl Zeiss Meditec fundus camera systems follow an integral and fully integrated approach to optimal diagnostic insight, documentation and disease monitoring. High-Resolution telecentric Zeiss optics provide superb details and quality of retinal disease presence and progression for optimal patient care.

The FF 450<sup>plus</sup> and VISUPAC Digital Image Management System integrate high resolution optics with a wide variety of digital sensors and user-friendly graphic controls. Sharper details and enhanced flexibility are the result of 150 years of recognized excellence in ophthalmology.

Call 800-342-9821 today for a consultation with your Carl Zeiss representative.
